The MSU Student Organic Farm is a 10-acre, certified organic year-round teaching and production farm that grows food for its Community Supported Agriculture program, on-campus farm stand, and MSU dining halls.

MSU’s Residential Initiative on the Study of the Environment (RISE) program provides students who share similar values and academic interests with a focused residential learning environment as well as an academic specialization in environmental studies. And being part of a Big Ten research university with global reach and vast opportunities at your fingertips comes with its own perks.

MSU was recognized in the Princeton Review’s 2012 Guide to 322 Green Colleges, which salutes “the nation’s most environmentally responsible ‘green colleges.’”

MSU earned a silver rating from the Sustainability Tracking, Assessment, and Rating System, or STARS, a new Association for the Advancement of Sustainability in Higher Education program that measures and encourages sustainability in all aspects of higher education.

The RISE program is a hub of activity and learning within the larger university setting. Students live in Bailey Hall, part of the Brody Neighborhood, which also houses classrooms, offices for faculty and advisers, a world-class dining facility, and an on-site greenhouse. RISE students get exclusive access to special sections of certain courses, providing opportunities for deeper discussion and understanding of subject matter. Living next door to your classmates is also conducive to spontaneous study groups.

Convenient access to faculty and advisers provides face-time and guidance related to academic courses, internship opportunities, mentoring and career planning, and access to MSU resources.

Our students share a vision for creating a more sustainable world and their diverse academic paths converge at RISE, where they benefit from a truly interdisciplinary learning experience. Our program partners with seven MSU colleges: Agriculture and Natural Resources, Arts and Letters, Broad College of Business, Communication Arts and Sciences, Engineering, Natural Science, and Social Science.
